

Early Intervention in PRT 10

[Register](#)

About

The purpose of the workshop is to give teams time together to reflect on the way they "typically provide services" and how they would "ideally" like to provide services. The Regional TA provider facilitates the discussion and shares evidence based practices that are most impacted by using Routines Based Early Intervention.

Individual team action plans are developed at the end of the workshop and are shared with the PRT leadership team. The results of the self-assessment provides the PRT with region-wide EI team perspective on current practices and provides data to influence professional development activities and impact EI service delivery.

This workshop is intended for all Early Intervention teams in the PRT. This includes ECSE, SLP, OT, PT, SC, and administrators.
